6) Strengths, Weaknesses, Comments:

- Specific strengths-which areas/concepts are covered exceptionally well?
- Specific weaknesses-which areas/concepts would likely require supplementing?

This is a good AP book, and also good for non-biology majors in college. Illustrations of humans are not specific to any race. f) all areas are covered except for nuclear reactions and wave behavior. Very many opportunities for critical thinking/reasoning. Student edition has a "test yourself" area, "think scientifically" for students to apply themselves, open-ended current issue questions. Web site is referenced for further resources but password not available. Instructor's Manual provides Free Response, Multiple Choice, Labs and Limited or No Access to Lab Facilities activities.
